Description:

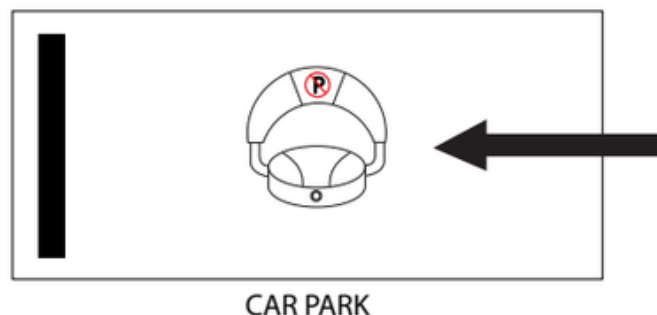

Secure your parking space with the Automatic Parking Lock, featuring remote and smartphone app control. Built from heavy duty, weather resistant steel, it provides reliable protection against unauthorised access. Ideal for private, business and reserved parking spaces, with automatic raising and lowering for added convenience.

Installation:

Upon receiving the product, charge the battery fully before use (even if the product is not going to be installed immediately.)

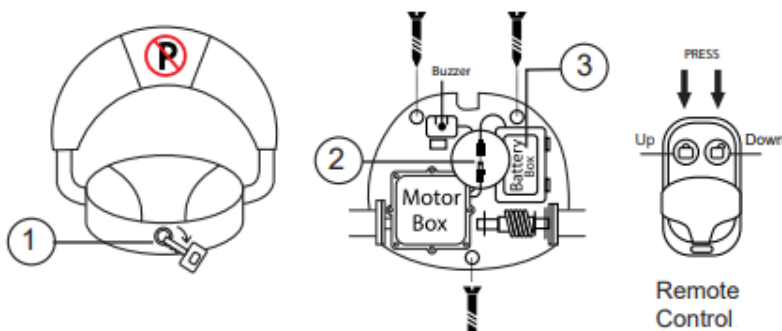

Before installation, ensure you select a suitable location in the centre of your parking space.

We recommend setting up and testing the app and remote control functions before securely fixing the parking lock to the surface.

Connection & Remote Controls:

1. Use the supplied keys to open base cover.
2. Connect the Battery Box to the Motor Box.
3. You will hear a 'Beep' sound which indicates the unit is connected correctly.
4. You can now close the Battery Box.
5. Remote Controls come already paired with the main unit.
(Make sure nothing is in the path of the main unit raising / lowering, press up / down button to test remote control.)

App Pairing:

Download and install KAVASS App on your Smart Phone from Google Play Store (Android) or Apple Store (iOS). Scan the QR codes here to download directly.
Open the app, after registration, you will see interface as shown below. Make sure your smartphone and remote controls are nearby and within operating range of the main unit.

SCAN HERE TO DOWNLOAD APP ↓

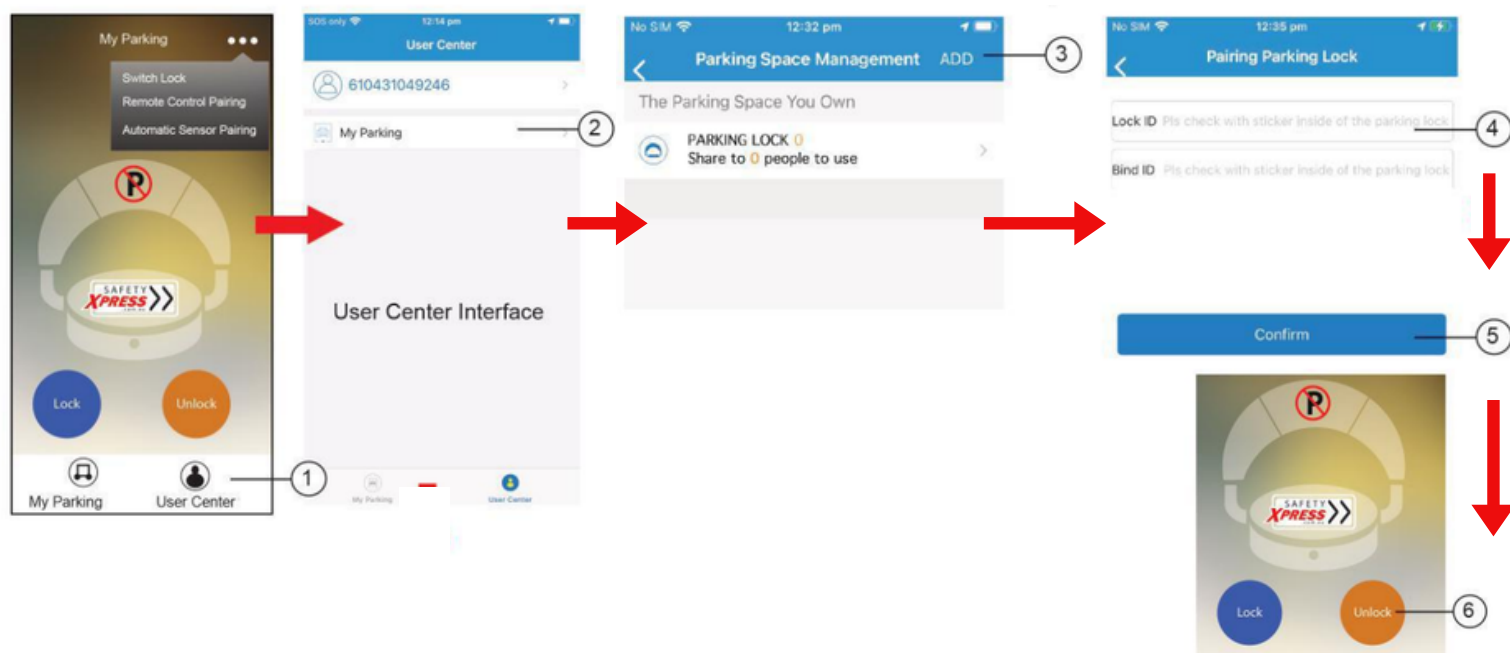

QR Code for iPhone

QR Code for Android Phone

1. Click **User Center**
2. Click **My Parking**
3. Click **ADD**
4. Open Base Cover to find your Lock ID and Bind ID.
(Please note these IDs are case sensitive.)
5. Click Confirm
6. You can now lock / unlock your parking lock using the app.
7. If an error shows or you need to change the registered owner, please contact us with your phone number, lock ID and bind ID. Our team will assist you with the registration process.

*Note: Multiple parking locks can be connected and controlled via the app on a single mobile device by following same steps above, and go to **Switch Lock** to switch between locks.*

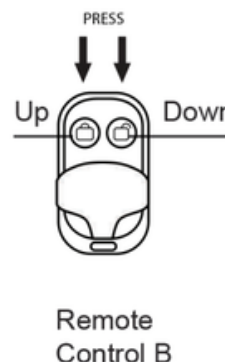

Extra Remote Control Pairing

Note: Both standard remotes come pre-paired. If you require additional remotes (sold separately), please follow the steps below to pair them with the unit.

Open KAVASS App, on right hand side top corner, click the 3 dots, and select > Remote Control Pairing.

Follow prompts on the next interface:

Press both buttons on Remote Control B simultaneously, after hearing a 'beep' sound, your Automatic Parking Lock should be paired with your smart phone.

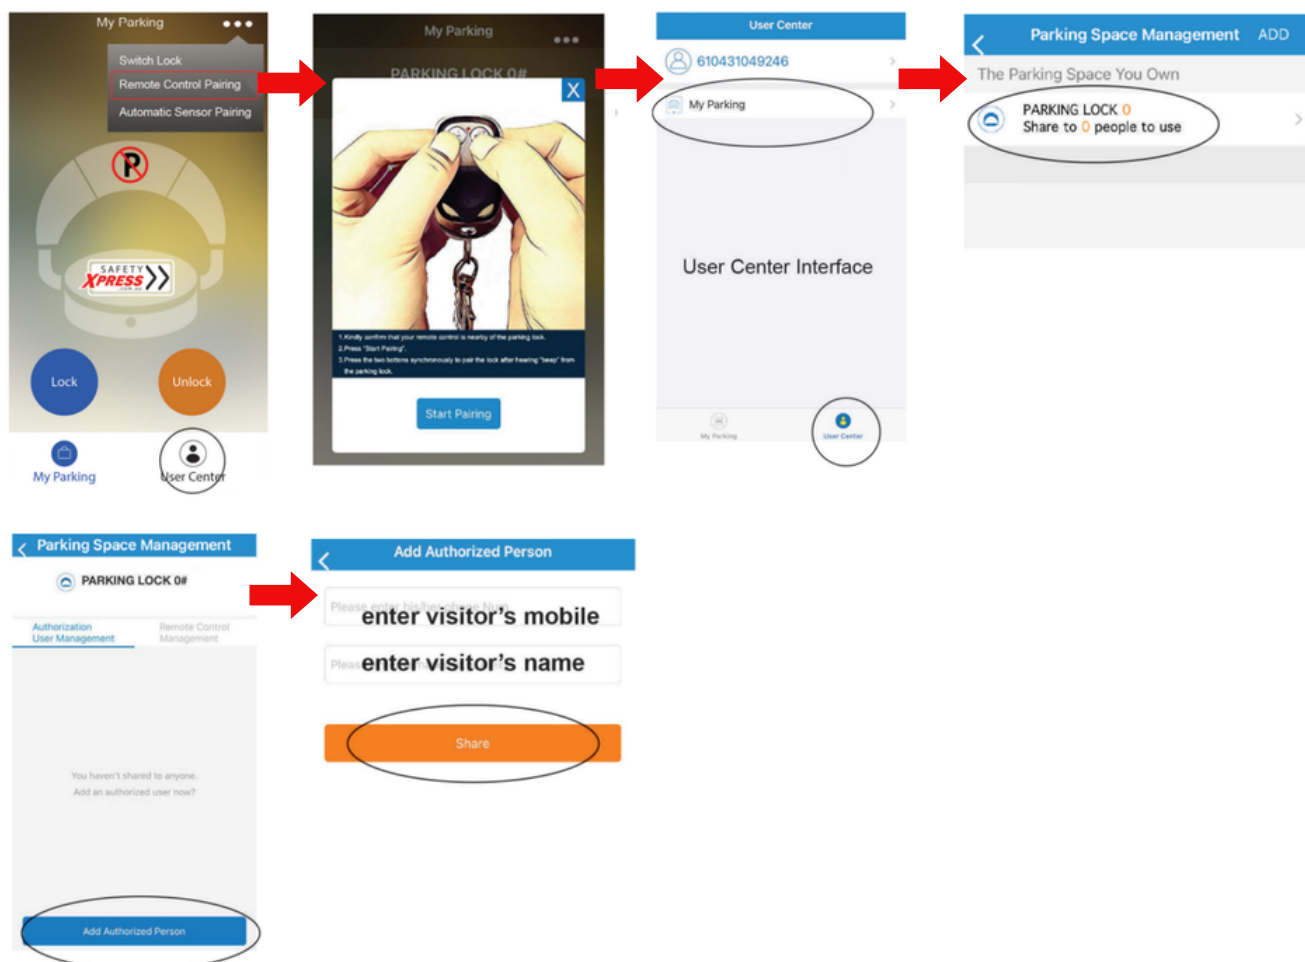

- Press button with lock symbol to raise the barrier bar up.
- Press button with unlock symbol to lower the barrier bar down.

Multiple User Control - App

Owners can give access to other users - such as visitors, by following the below steps:

1. Click User Center (at bottom right of main screen)
2. Click My Parking
3. Pick the Parking Lock you want to give visitor access to
4. Add Authorised Person (visitor)
5. Enter visitor's Mobile and Name
6. Click Share
7. Once sharing is successful, all users should see the same interface (blue and white interface as shown on left)

Note: Owner has control to add / delete visitors at any time, maximum 10 users can be given temporary access as visitors to the Parking Lock (by repeating the same steps.)

Automatic Parking Lock - Features

Water Resistant:

The Automatic Parking Lock is designed to withstand various weather conditions, including heavy rainfall. The unit can continue operating in wet conditions for at least one hour without adverse effects.

Self Protection:

The Automatic Parking Lock features built-in protection to help prevent damage in the event of misuse or if a vehicle accidentally drives over the unit:

- **180° Rotation:** The unit can rotate back and forth to help protect itself.
- **Pressure Resistance:** Withstands pressure of up to 2,000 kg.
- **Automatic Reset:** Automatically resets when forced or pushed while operating.

Battery:

Important: Upon receiving the product, charge the battery fully before use, even if the product is not going to be installed immediately. Ensure to recharge the battery at least once every six months, even when the product is not being used.

When the battery is about to run out, the Automatic Parking Lock will make an alarm sound to remind the user to charge the battery.

Rechargeable 6V7A Lead Acid Battery

Charging Method	Rechargeable
Battery Life	3 months
Working Temperature	-10°C to 50°C
Life Span	24 months

Important Notes:

- DO NOT attempt to raise the Automatic Parking Lock barrier bar when a vehicle is positioned over it.
- DO NOT drive or park over the Automatic Parking Lock while the barrier bar is raising or lowering.
