Enhance the safety and access control of your property with this newly designed T-Handle Removable Bollard, offering a refined look and easier handling.

Offers both protection and convenience, ensuring optimal safety and access control for your property

Ideal Applications:

- Warehouses
- Garages & driveways
- Loading zones
- Private parking areas
- Retail storefronts
- Areas requiring temporary access restriction

Removable Bollard - 90mm Surface Mount Slider Type T-Handle - Unique Key

Tools Required:

- Hammer drill with correct drill bit
- Countersunk fixings
- Hand broom or industrial vacuum
- Personal Protective Equipment

Installation:

1. Read the installation guide fully before starting.
2. Choose the exact position for the bollard. If installing multiple bollards, mark out the locations and use a line to ensure they are aligned.
3. Position the slider receiver plate and drill pilot holes to mark each fixing point. Then continue drilling each hole to the required depth for your fixings.
4. Remove the receiver plate and clean out all dust from the holes using a broom or vacuum.
5. Reposition the receiver plate and secure it into the drilled holes using countersunk fixings.
6. Slide the bollard in and out of the receiver plate a few times to check movement.
Lock it in place using the provided keys. Do not force the lock or turn the key incorrectly, as this may cause damage.
